BBA

Biomembranes

Vol. 1111, 1992

Cumulative Contents

Regular Papers

Evidence that the scavenger receptor is not involved in the uptake of negatively charged liposomes by cells
K.-D. Lee, R.E. Pitas and D. Papahadjopoulos (USA) 1

The mode of action of *Vibrio cholerae* cytolysin. The influences on both erythrocytes and planar lipid bilayers
O.V. Krasilnikov, J.N. Muratkhodjaev and A.O. Zitzer (Uzbekistan, Kazakhstan) 7

Characterization of CO_2/carbonic acid mediated proton flux through phosphatidylcholine vesicles as model membranes
F.A. Norris and G.L. Powell (USA) 17

Vasopressin stimulation of vanadate-sensitive Na^+ transport by liver plasma membrane vesicles. Evidence for regulation via phospholipase C and protein kinase C activities
G. Piec and A. Jakob (Switzerland) 27

Alcohols produce reversible and irreversible acceleration of phospholipid flip-flop in the human erythrocyte membrane
C. Schwichtenhövel, B. Deuticke and C.W.M. Haest (Germany) 35

Experimental evidence for the involvement of the cytoskeleton in mammalian cell electropermeabilization
M.-P. Rols and J. Teissié (France) 45

Endoplasmic reticulum: the major contributor to the PDE peak in hepatic ^{31}P-NMR spectra at low magnetic field strengths
E.J. Murphy, T.E. Bates, S.R. Williams, T. Watson, K.M. Brindle, B. Rajagopalan and G.K. Radda (UK) 51

Developmental changes in hepatic basolateral membrane lipid composition and fluidity
D. Novak, W. Ray, J. Carver and S. Grossman (USA) 59

Effect of the sulfhydryl reagent thimerosal on cytosolic free Ca^{2+} and membrane potential of thymocytes
A.S. Gukovskaya, E.S. Trepakova, V.P. Zinchenko, Y.N. Korystov and V.V. Bezuglov (Russia) 65

Identification of a regulated Na/K/Cl cotransport system in a distal nephron cell line
P.Y. Fan, M. Haas and J.P. Middleton (USA) 75

A channel model with fluctuating barrier structures
J. Nieto-Frausto and B. Kleutsch (Germany) 81

Characterization and chemical modification of the Na^+-dependent bile-acid transport system in brush-border membrane vesicles from rabbit ileum
W. Kramer, S.-B. Nicol, F. Girbig, U. Gutjahr, S. Kowalewski and H. Fasold (Germany) 93

Effects of membrane lipids and -proteins and cytoskeletal proteins on the kinetics of cholesterol exchange between high density lipoprotein and human red blood cells, ghosts and microvesicles
J.C. Gold and M.C. Phillips (USA) 103

$Na^+/K^+/Cl^-$ cotransport in resealed ghosts from erythrocytes of the Milan hypertensive rats
P. Ferrari, L. Torielli, S. Salardi, A. Rizzo and G. Bianchi (Italy) 111

Transport of phospholipids between subcellular membranes of wild-type yeast cells and of the phosphatidylinositol transfer protein-deficient strain *Saccharomyces cerevisiae sec 14*
E. Gnamusch, C. Kalaus, C. Hrastnik, F. Paltauf and G. Daum (Austria) 120

The influence of cholesterol 3-sulphate on phase behaviour and hydrocarbon order in model membrane systems
N. Kitson, M. Monck, K. Wong, J. Thewalt and P. Cullis (Canada) 127

Rapid Reports

Incorporation of carotenoids in aqueous systems: uptake by cultured rat hepatocytes
P. Grolier, V. Azaïs-Braesco, L. Zelmire and H. Fessi (France) 135

Substrate-specific differences in the rate of bile acid carrier reorientation: studies on human placental basal vesicles
N. Eleno, C.A.R. Boyd and J.J.G. Marin (UK, Spain) 139

Corrigendum 143

Regular Papers

Membrane-potential-dependent uptake of tryptamine by rat intestinal brush-border membrane vesicles
M. Sugawara, M. Sasaki, K. Iseki and K. Miyazaki (Japan) 145

Different patterns of cell volume regulation in hyposmotic media between attached and suspended HeLa cells
T. Ikehara, H. Yamaguchi, K. Hosokawa, A. Takahashi, T. Masuya and H. Miyamoto (Japan) 151

Expression of amiloride-sensitive Na^+ channels of hen lower intestine in *Xenopus* oocytes: electrophysiological studies on the dependence of varying NaCl intake
W.-M. Weber, C. Asher, H. Garty and W. Clauss (Germany, Israel) 159

Induction of two K^+ currents by complement component C5a in mouse macrophages
M. Ichinose, N. Hara, M. Sawada and T. Maeno (Japan) 165

Permeability of lipid bilayers to amino acids and phosphate
A.C. Chakrabarti and D.W. Deamer (Canada, USA) 171

Localization of the binding domain of the inhibitory ligand forskolin in the glucose transporter GLUT-4 by photolabeling, proteolytic cleavage and a site-specific antiserum
B. Hellwig, F.M. Brown, A. Schürmann, M.F. Shanahan and H.G. Joost (Germany, USA) 178

Exchange efflux of [^{3}H]palmitate from human red cell ghosts to bovine serum albumin in buffer. Effects of medium volume and concentration of bovine serum albumin
I.N. Bojesen and E. Bojesen (Denmark) 185

Alteration of the passive electrical properties of lymphocyte membranes induced by GM1 and GM3 glycolipids
C. Cametti, F. De Luca, A. D'Ilario, M.A. Macrì, B. Maraviglia, F. Bordi, L. Lenti, R. Misasi and M. Sorice (Italy) 197

A new diffusion chamber system for the determination of drug permeability coefficients across the human intestinal epithelium that are independent of the unstirred water layer
J. Karlsson and P. Artursson (Sweden) 204

Influence of staphylococcal δ-toxin on the phosphatidylcholine headgroup as observed using ^{2}H-NMR
J.R. Rydall and P.M. Macdonald (Canada) 211

Measurement of plasma membrane potential in isolated rat hepatocytes using the lipophilic cation, tetraphenylphosphonium: correction of probe intracellular binding and mitochondrial accumulation
S. Saito, Y. Murakami, S. Miyauchi and N. Kamo (Japan) 221

Expression of GLUT-2 cDNA in human B lymphocytes: analysis of glucose transport using flow cytometry
M.I. Rauchman, J.C. Wasserman, D.M. Cohen, D.L. Perkins, S.C. Hebert, E. Milford and S.R. Gullans (USA) 231

Effect of cationic cholesterol derivatives on gene transfer and protein kinase C activity
H. Farhood, R. Bottega, R.M. Epand and L. Huang (USA, Canada) 239

Solubilization and purification of the prostaglandin E_2 receptor from cardiac sarcolemma
M. Michalak, E.L. Wandler, K. Strynadka, R. Catena, H.-J. Liu and P.M. Olley (Canada) 247

Retinal and retinol promote membrane fusion
K. Boesze-Battaglia, S.J. Fliesler, J. Li, J.E. Young and P.L. Yeagle (USA) 256

The mechanism of the solute-induced chain interdigitation in phosphatidylcholine vesicles and characterization of the isothermal phase transitions by means of dynamic light scattering
N.E. Nagel, G. Cevc and S. Kirchner (Germany) 263

Rapid Report

Cocaine induces intracellular free Mg deficits, ischemia and stroke as observed by in-vivo ^{31}P-NMR of the brain
B.M. Altura and R.K. Gupta (USA) 271
